Comfort Club Water Heater Plan

1 Visit Per Year

\$79

Monthly Plans Also Available

Continues Until Canceled

20%

Discount On Jobs

Hot Water

- No dispatch fees
- 24/7/365 support/service
- 20% off all repairs
- 21-point system check
- 1 cleaning per calendar year
- \$500 credit toward system replacement
- Vinegar flush or heat exchanger/drain water heater tank
- Check all safeties
- Gas pressure test
- Combustion analysis
- Clean ignitor
- Clean flame rod
- Check all venting
- Ensure hot water temperature is accurate
- Check & test relief valve

Comfort Club Heat Plan

1 Visit Per Year

\$99

Monthly Plans Also Available

Continues Until Canceled

20%

Discount On Jobs

- No dispatch fees
- 24/7/365 support/service
- 20% off all repairs
- 21-point system check
- 1 cleaning per calendar year
- \$500 credit toward system replacement
- Check all safety controls & wire connections
- Clean & inspect burners and burner compartment
- Visual inspection of heat exchanger
- Clean & check thermocouple | flame sensor
- Clean & check ignitor/spark electrode/pilot
- Check filters | offer replacement
- Remove & clean blower | test run capacitor performance
- Adjust dampers for heating/cooling mode
- Check & flush condensate drains & traps
- Inspect venting system for leaks/slope/support/debris
- Check for required service access & clearances to combustibles
- Check for adequate combustion air requirements
- Lubricate all moving parts
- Cycle furnace & monitor ignition & flame
- Check & record manifold pressure
- Check temperature rise & adjust blower speed as required
- Perform CO test – circulating air/free air/vent & record
- Test fuel line for leaks at appliance
- Wipe down furnace | clean up around furnace
- Offer replacement batteries for smoke detector
- Review & document results/recommendations with customers

Add Additional Equipment **\$4.10/Month** Or **\$49.00** Annually

Comfort Club Cooling Plan

1 Visit Per Year

\$99

Monthly Plans Also Available

Continues Until Canceled

20%

Discount On Jobs

- No dispatch fees
- 24/7/365 support/service
- 21-point system check
- 1 cleaning per calendar year
- \$500 credit toward system replacement
- Condenser coil – cleaned as required (dirty condenser coils raise refrigerant pressure higher than needed, increasing your electric bill)
- Refrigerant charge – checked by superheat/supercooling method (thermocharging) (a low or high refrigerant charge can easily go unnoticed and increase operating costs up to 30% – an improper charge can cause compressor shutdown)
- Controls & safeties – inspected & tested (controls & safeties that do not function properly can increase operation cost & cause other components to fail)
- Relays & contactors – inspected & cleaned (worn contacts & loose wire connections can lead to motor or compressor failure)
- Crankcase heater – operationally inspected
- Unit wiring – inspected & loose connections tightened (loose connections can lead to a motor, control, or compressor failure)
- Capacitors – tested (bad capacitors can lead to compressor & motor failure)
- Unit disconnect – check wiring
- Lubrication – application to motors & bearings
- Temperature & pressures – taken & recorded (an accurate record of your equipment's vital data can indicate potential problems, which can be eliminated – a record will be kept with the unit which may reduce emergency service time)
- Belts & pulleys – inspected & adjusted (loose belts & worn pulleys decrease air flow, increase operating costs & shorten the compressor's life. Belts crack & break with age)
- Condensate drain – checked to assure it is open (algae & dust can plug a condensate drain which can cause extensive water damage to your furnace)
- Voltage & amp – draw of the blower motor, compressor & condenser fan motors checked & recorded (improper voltage & amp draw increase operating costs & can shorten the life of any motor)
- Thermostat – checked & calibrated (improperly calibrated thermostats cause the unit to run longer than necessary – every degree your air conditioner operates below 78 degrees can add 5%-8% to the cost of cooling)
- Motors – cleaned & inspected (dirty motors are less efficient & will fail sooner)

Add Additional Equipment **\$4.10/Month** Or **\$49.00** Annually

Comfort Club Combo (Heating & Cooling Plan)

1 Visit Per Year

\$149

Monthly Plans Also Available

Continues Until Canceled

20%

Discount On Jobs

- No dispatch fees
- 24/7/365 support/service
- 20% off all repairs
- 21-point system check
- 1 cleaning per calendar year
- \$500 credit toward system replacement

Includes all benefits of the Comfort Club Heat Plan and the Comfort Club Cooling Plan

Add Additional Equipment **\$4.10/Month** Or **\$49.00** Annually

Comfort Club Total Home Protection Plan (Heating, Cooling & Hot Water)

1 Visit Per Year

\$199
